

Fast, Secure and Highly Available Search Infrastructure

Managed Solr is a fully-managed SaaS solution that automates, manages and scales Solr search infrastructure in public or private clouds in over 60 regions on AWS, Azure and Google Cloud.

Managed Solr allows your developers to implement faster, and spend more time focused on building a better search experience and less time supporting search infrastructure.

Managed Solr is Better Than DIY

- ✓ Multi-region support
- ✓ Scale as you go
- ✓ Secure and compliant
- ✓ Automated monitoring
- ✓ Architecture from dev to production

Support Mission-Critical Applications

SLA-backed Support packages to meet every business need

CORE FEATURES			SECURITY & COMPLIANCE		INTEGRATIONS
CLOUD AUTOMATION	AUTOMATED BACKUPS	DISASTER RECOVERY	SSO & 2FA	PRIVATE ENVIRONMENT	INTEGRATION PLUGIN
MONITORING, ALERTING	ON-DEMAND SCALING	ROLES AND PERMISSIONS	ENCRYPTION AT REST AND TRANSPORT	SOC2 & GDPR COMPLIANT	DEVELOPER APIS

It can be quite difficult and time-consuming to get a proper Solr implementation set up on one's own...SearchStax has lifted that burden and made it very easy for us to quickly get a properly configured environment up and running, from very basic to extremely robust.
